# Connectivity Snapshot

INDUSTRY INSIGHTS - DECEMBER 2021

## It's that time of year to Connect with friends and family again!

And just like that, 2021 is over and we are at Christmas and New Year time again!

The year has proven to be one of ups and downs in a post(almost) Covid climate but the Connectivity world has continued to grow and develop from strength to strength.

Next year will be huge as businesses move to take product from concept to delivery, from pre-revenue to revenue generating and start launching new and exciting products and services across the globe.

### In this issue:

Vodafone, Mavenir complete first VoLTE call over containerized open RAN solution

BAI Communications selects key ADVA technology to bring mobile connectivity to London Underground

## Featured Companies

JMA Wireless

Airspan Networks

Skyhook

BAI

Sigfox

DZS

LG

Vodafone

## Vodafone, Mavenir complete first VoLTE call over containerized open RAN solution

Vodafone UK and virtualized RAN software specialist Mavenir are claiming the first successful data and Voice over LTE (VoLTE) call across a containerized 4G small cell Open RAN solution. Achieved in a lab environment, the results are the product of a previously announced partnership between the companies, in which the pair are using Open RAN systems to expand in-building 4G coverage for medium- and large-sized enterprise facilities.

## BAI Communications selects key ADVA technology to bring mobile connectivity to London

ADVA (FSE: ADV) today announced that it is supplying BAI Communications with key technology to support the introduction of mobile connectivity throughout the London Underground. The London Underground network – also known as “The Tube” – is one of the UK’s most high-profile areas of poor connectivity with little phone coverage. ADVA’s technology will help play an important role in supporting the UK capital as it continues to leverage smart city technology and improve urban life.
