

In our quarterly feature, Companies in Focus, we highlight leading companies in the Connectivity landscape whose recent achievements are making waves in our industry, casting the spotlight on companies that are setting unprecedented benchmarks and shaping our future.

Featured Companies:

onomondo

syniverse.

Brought to you by

onomondo

Onomondo's mission has always been to redefine the capabilities of IoT networks and, consequently, to tackle the obstacles that have hindered the growth of IoT over the last decade.

Recently, Onomondo took big strides, successfully integrating their SoftSIM into Nordic Semiconductor's series-based designs for cellular loT devices.

Testing data shows a 90-100% reduction in power consumption, with potential benefits including lower costs, enhanced power efficiency, and increased flexibility for IoT projects. The collaboration aims to break down barriers between hardware and software in the IoT industry and continue to disrupt the industry into 2024.

Ubiquity's open-access network model, leased to multiple internet service providers, aims to provide consumer choice and minimize disruptions.

In November 2023, Ubiquity secured a green loan to accelerate the deployment of open-access fiber networks in Texas, California, Arizona, and Nebraska.

The company is part of the growing number of open access network providers in the U.S. With this new financial backing, Ubiquity has huge sights ahead for 2024!

The edge is still a very new concept, and one that is still finding its feet. However, when it comes to integrability and educating the ecosystem on its use case, Edge Impulse is certainly head and shoulders above the rest.

They recently partnered with IAR to build an integrated system, which uses AI and ML in the workflow.

Through their great partnerships and groundbreaking technology, Edge Impulse is set to continue enabling critical computing power at the edge.

Weaver Labs have been at the forefront of the UK telecom industry since 2019, are now actively contributing to the Open Networks ecosystem, centered around its flagship product, Cell-Stack.

Website

Their mission involves overcoming connectivity barriers through an innovative infrastructure-sharing model and collaborating with industry leaders to advocate for telecom market competition, particularly for social good.

in LinkedIn

Weaver Labs is embarking on an exciting integration with Web3 technologies, with a special focus on the DePIN side. This initiative reflects their commitment to revolutionize telecommunications supply chains and business models, rooted in enhancing connectivity inclusivity and bridging the digital divide.

There are around 1.5 million kilometers of subsea fiber, and Tampnet is leading the charge when it comes to the 4G and LTE offshore industry.

In 2023 they acquired the German offshore wind connectivity business dasNetz, solidifying their ambitions to break into the wind and renewables market.

Website

Their groundbreaking acquisitions and tech has made Tampnet the leading provider of high-speed, low-latency connectivity, so they are set to have an amazing 2024, and we look forward to seeing what the year brings for them.

in LinkedIn

1nce is committed to throwing away the norms of IoT connectivity and delivering a lifetime flat rate on their eSIMs.

In 2023 they announced their 'Freedom to Switch,' which is the company's answer to the vendor lock-in issues that the IoT industry faces.

Website

Connecting people in 150+ countries, their solutions that allow customers the freedom to switch vendors. This is sure to make 1nce the leader in the space moving into 2024.

Connectivity is crucial to everything we do in our day to day lives, and EMnify is leading the way in getting businesses connected.

Recently partnering with BWS IoT in Brazil, EMnify is helping to enable the expanding portfolio of IoT products in the region.

As more and more IoT devices are connected to the ecosystem, the ability to seamlessly move between networks and industries increases, putting EMnify in a position to lead and enable growth.

syniverse

Connecting on a global scale is no small feat, and Syniverse has been one of the leaders in the wholesale space doing exactly this for years.

In 2023, Kaleido Intelligence named Syniverse the leader in mobile roaming for the 3rd year in a row.

We also saw them team up with Microsoft to deliver a SIM solution for Azure that enables IoT devices to move between 5G and LTE networks.

Syniverse is in a stronger position than they have ever been in the past, and are certainly in for a great 2024.

Celebrating the 25th anniversary last year, SOLiD is still dedicated to providing 5G coverage and faster speeds for in-built connectivity.

In September of 2023, SOLiD and ASOCS announced they have teamed up to provide an O-RAN solution for private 5G.

This solution will be supporting both standalone and non-standalone infrastructure, to help empower Industry 4.0.
