

Cyber Security Companies In Focus

In our quarterly feature, Companies in Focus, we highlight leading companies in the Cyber Security landscape whose recent achievements are making waves in our industry, casting the spotlight on companies that are setting unprecedented benchmarks and shaping our future.

Featured Companies:

GREYNOISE

CYREBRO

ANOMALI

HADRIAN

Brought to you by

GREYNOISE

Cyber threat intelligence firm, Greynoise, has swept three prestigious GLOBE Cybersecurity Awards, solidifying its status as a rising industry leader.

These accolades celebrate the company's continued innovation in internet background noise analysis and its unique approach to filtering out irrelevant data. With these wins, Greynoise is not only gaining recognition for its cutting-edge tools but also reinforcing the critical role it plays in streamlining security operations.

This momentum positions the company as a trusted name for threat prioritisation and incident response in a crowded cybersecurity market.

Menlo Security has announced a strategic integration with Google Cloud WAN to deliver turnkey zero-trust access.

This partnership aims to simplify and secure cloud-native network connectivity, combining Menlo's isolation-powered architecture with Google's global infrastructure. The integration enables enterprises to reduce reliance on legacy VPNs while improving user experience and security posture.

As demand grows for scalable, secure access solutions, Menlo's proactive stance on zero-trust adoption places it at the forefront of network security evolution, appealing strongly to organisations focused on future-ready IT frameworks.

CYREBRO

Cyrebro continues to stand out as a centralised cybersecurity operations platform tailored for SMEs and MSSPs. While not tied to a specific article this quarter, its consistent recognition across industry reports and client case studies highlights its strength in simplifying SOC functions.

By offering real-time visibility, threat intelligence, and expert guidance, Cyrebro empowers teams to respond faster and smarter to cyber threats.

As mid-market organisations seek robust yet manageable cybersecurity solutions, Cyrebro's platform presents a compelling proposition for growing digital defence demands.

Heimdal Security is ramping up its European presence through key MSP-focused partnerships.

In early 2025, the Danish firm teamed up with Watsoft to enhance cybersecurity for MSPs in France and later expanded its footprint in Spain via a collaboration with Interbel.

These alliances will enable the distribution of Heimdal's unified security suite to a broader base of SMEs. By tapping into established regional partners, Heimdal demonstrates strategic growth and localisation, catering to the increasing demand for advanced, scalable, and partner-driven cyber protection across Europe.

Anomali has expanded its partnership with the Cybersecurity and Infrastructure Security Agency (CISA)-backed Joint Cyber Defence Collaborative (JCDC), focusing on automation and risk reduction.

This move builds on their longstanding collaboration and aims to enhance national cybersecurity resilience through improved threat intelligence sharing and orchestration.

As threat landscapes become more sophisticated, Anomali's strategic alliances with key public and private stakeholders underscore its leadership in collective cyber defence efforts, providing an appealing narrative for clients and partners aligned with national security goals.

Amsterdam-based Hadrian has been making waves in early 2025 with two major advancements.

First, it was awarded Frost & Sullivan's 2025 New Product Innovation Award for its continuous security platform. Second, it unveiled a custom AI tool that significantly improves subdomain detection. These achievements showcase Hadrian's emphasis on automation and precision in attack surface management.

As the attack perimeter continues to expand, Hadrian's innovations equip organisations with the proactive tools needed to stay ahead, marking it as one to watch in modern cyber resilience.

Paris-based Sekoia.io has secured €26 million in Series A+ funding to scale its AI-powered threat detection and cyber intelligence platform.

The round, backed by notable investors, will support team expansion and accelerated market reach across Europe. Known for its high-performance SOC tooling, Sekoia.io is poised to deliver proactive threat identification and actionable insights to security teams.

As demand intensifies for automated, intelligence-led defences, this funding milestone positions Sekoia.io for significant impact in the European cybersecurity landscape.

Barrier Networks has joined forces with XONA to boost operational technology (OT) security across critical infrastructure.

The partnership integrates XONA's zero-trust access platform with Barrier's cybersecurity expertise, enhancing secure remote access for OT environments.

With increasing cyber threats targeting industrial systems, this collaboration strengthens the ability of utilities and manufacturers to maintain resilience. The move underlines Barrier Networks' commitment to protecting essential services

Fortanix has introduced Armet.AI, a platform designed to help enterprises securely develop and deploy GenAI applications.

Launched in April 2025, the solution enables teams to build AI tools that remain compliant and protected from data exposure risks. It extends Fortanix's confidential computing capabilities into the AI space, addressing a critical intersection of innovation and security.

As AI adoption accelerates, Fortanix's offering provides a timely and essential solution, appealing to enterprises focused on balancing advancement with risk mitigation.
