Strengthening Networks: Smarter Modules, Global Moves, and Outage Solutions

May's Connectivity Insights spotlights major strides in smart module development and global service expansion. From Telit Cinterion's AI-powered 5G launch to Ookla's outage-fighting capabilities, we also look at notable IoT deployments from 1oT and JSC Ingenium. This month shows the industry's increasing focus on resilience, intelligence, and scale.

Tackling Network Disruptions with Downdetector

Downdetector, powered by Ookla, has become an essential tool for resolving large-scale connectivity issues.

By leveraging crowdsourced outage reports, it offers near-instant visibility into network disruptions.

Used by telecom providers, cloud platforms, and app developers alike, it plays a pivotal role in maintaining user trust and ensuring rapid response to service interruptions.

Telit Cinterion

Telit Cinterion Debuts AI-Powered 5G Modules

Built on Qualcomm's advanced modem technology , Telit Cinterion has introduced a new line of AI-enhanced 5G modules and data cards.

These innovations target industrial and enterprise sectors, aiming to deliver higher performance, improved reliability, and seamless integration for next-gen connectivity solutions.

The launch supports faster deployments and smarter applications across industries.
