A frontrunner in security awareness, SoSafe is intensifying efforts to combat emerging cyber threats.

In Q2 2025, they launched a new MSP platform aimed at empowering managed service providers to scale security training for SMEs. This coincided with enhancements to their main platform, introducing upgraded Copilot features and learner tools.

Coupled with the publication of their 2025 Cybercrime Trends report highlighting AI-driven attacks, SoSafe continues to lead in human-centric cybersecurity education and solutions, addressing a vital area in today's evolving threat landscape.

Keepit is advancing its global reach in SaaS data protection through key strategic moves.

The company partnered with Ingram Micro in Q2 2025, to bolster distribution across the UK and appointed Dan Middleton as VP for UK & Ireland to lead regional sales and partnerships.

These developments underscore Keepit's ambition to grow its market share and offer enhanced data resilience to enterprises navigating increasingly complex cloud environments.

Known for its developer-first approach to code security, Sonar expanded its offering in 2025 with the launch of SonarQube Advanced Security.

The update includes broadened Static Application Security Testing (SAST) features and the introduction of Software Composition Analysis (SCA) capabilities.

These enhancements aim to better equip development teams with actionable insights and more robust tools for early vulnerability detection. As secure coding practices become more critical, Sonar is reinforcing its position as a pivotal player in secure software development.

## MITIGA

### **Website**

Cloud incident response specialist Mitiga is expanding its leadership and technology footprint.

With the appointments of John Vecchi as Chief Marketing Officer and John Stockel as Chief Financial Officer in June 2025, the company signaled a strategic focus on growth and brand expansion.

Complementing these leadership changes, Mitiga also introduced Helios AI, a new tool designed to automate alert triage and threat remediation in cloud environments. These developments position Mitiga as a forward-thinking leader in incident readiness and response.

Cyber threat intelligence firm Prodaft is reshaping how organisations access dark web insights.

🚯 Website

In mid-2025, the company launched "Sell Your Source (SYS)," an initiative designed to anonymously acquire cyber threat intelligence from underground forums.

This programme enhances Prodaft's ability to detect and respond to emerging threats before they escalate. With SYS, Prodaft continues to drive innovation in proactive intelligence gathering and dark web surveillance, vital in today's expanding threat landscape.

in LinkedIn

Jit, the application security startup is accelerating DevSecOps efficiency with the integration of AI-driven tools.

In Q2 2025, the company rolled out intelligent agents that assist application security teams with automating risk assessments and compliance checks.

These enhancements are designed to streamline workflows and reduce time-to-remediation. As organisations seek scalable security solutions, Jit's AI-powered automation is gaining traction, positioning the company at the forefront of simplified and intelligent AppSec.

Syteca continues to enhance its privileged access management capabilities.

They added support for Linux environments to its Privileged Account Discovery feature in Q2 2025, expanding its reach across diverse enterprise infrastructures.

This development reflects Syteca's commitment to comprehensive and adaptive identity security. As hybrid IT ecosystems grow, such enhancements are critical for organisations aiming to maintain robust visibility and control over privileged accounts.

Static analysis leader Semgrep is advancing secure software

development through strategic integrations.

Announcing their partnership with Replit in May 2025 allowed the company to integrate its scanning tools into AI-assisted coding workflows. This move brings real-time, contextaware security to developers as they code, improving early vulnerability detection.

By embedding secure practices directly into development environments, Semgrep is championing the shift-left approach in modern AppSec.

in LinkedIn

Nagomi is making waves in continuous threat exposure management (CTEM).

In March of 2025, the company received the Cybersecurity Excellence Award and was recognised as a finalist in the SC Awards for its CTEM capabilities. At RSA Conference in May 2025, it launched a Program Performance Management module designed to benchmark and enhance security programme maturity.

These achievements highlight Nagomi's growing influence in helping enterprises proactively manage and optimise their threat exposure strategies.
